Faculty for physical education, sport  
and health

**International platform for  
collaboration - Erasmus+ project**

---

With the support of the  
Erasmus+ Programme  
of the European Union

---

## How it was envisioned

The International platform for collaboration for the Erasmus+ project, was envisioned to be an interactive board where members can share their knowledge and experiences gained through the project.

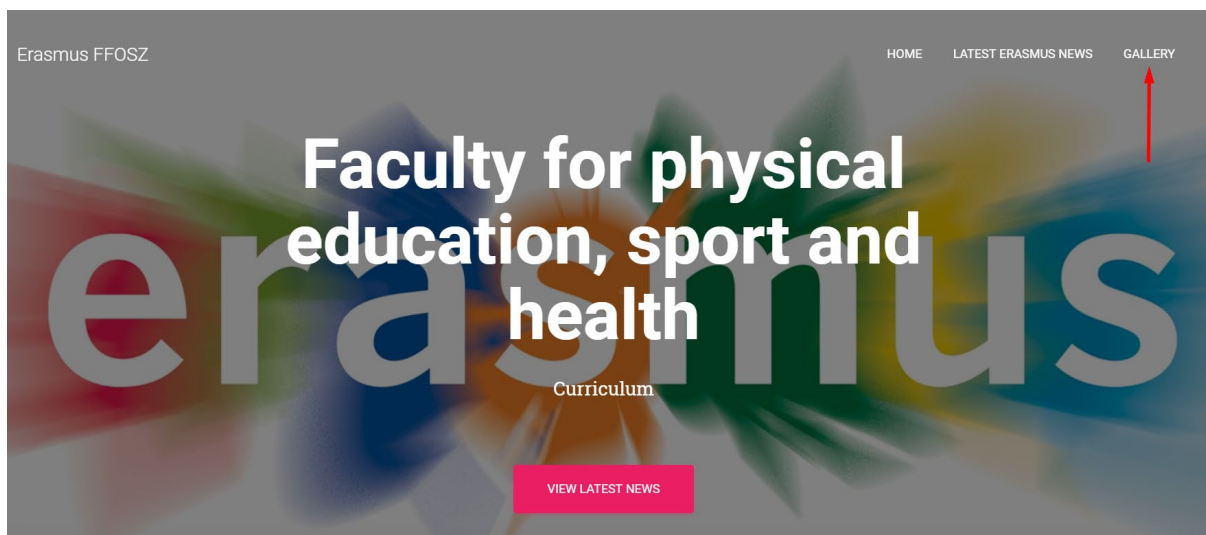

## The Erasmus+ gallery for the Faculty of physical education, sport and health

As a separate entity, we have developed a web page to house the multiple different galleries and many images which are taken during the project.

The design is innovative and easy to use. To visit the website, please follow the link bellow:

<https://erasmus.pesh.mk>

On the image bellow you can see the GALLERY link with an arrow pointing up to it. Use the link in the menu to view the several different galleries.

There are currently 4 galleries about different phases of the Erasmus+ project:

---

With the support of the  
Erasmus+ Programme  
of the European Union

---

1. Multiplier Events
2. Intellectual Outputs
3. Transnational Project Meetings
4. Slovenia, Ljubljana

## The platform – function

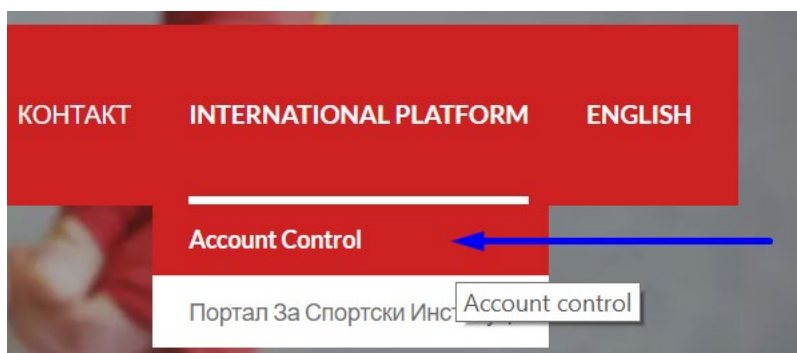

To visit the International platform, please enter the following link in your web browser of choice:

<https://ffosz.ukim.edu.mk/platform>

All new members that wish to participate have to write an email to the system administrator in charge: [admin@ffosz.ukim.edu.mk](mailto:admin@ffosz.ukim.edu.mk) in order to get further details on how to get their account.

This has been purposely done as to prevent unauthorized or phony individuals from commenting and participating on the platform, therefore diminishing the quality of the discussion and the validity of the information being posted. However, everyone can view the topics which are being discussed by visiting the platform – it is open to the world – as per the Erasmus ideology.

After you have gotten your login credentials, you may login by clicking the following button in the main menu:

Note that regardless of the language you choose when you open the website, the International platform is in English, so that everyone can participate.

## Topics and subtopics on the platform

There are currently two main forums as part of the platform:

---

## With the support of the Erasmus+ Programme of the European Union

1. Erasmus+ 2018/2019
2. Sport in Macedonia

Forum
Erasmus+ 2018/2019
Sport in Macedonia

We are going to focus on the Erasmus+ 2018/2019 forum as it's envisioned to be the primary forum where most of the communication will be made. When you click on the link, you are presented with all of the topics and respected subtopics. Participants which have already logged in can reply or share their knowledge on the different subjects and topics. The rest of the users who are not logged in, can still view and experience the Erasmus+ International platform, but they will not be able to participate in the discussion.

## Security optimizations being made on the platform

Security optimizations are being constantly made and improved in order to increase the level of protection of the web platform and website. This includes system optimization of apache2, customization of a firewall with custom rules for filtering malicious traffic and malicious requests to the database. Using these security optimizations we are preventing:

- Brute force attacks from automatic bots
- Complex attacks such as SQL Injection and similar
- Targeting with spam comments, false posts and the likes

In addition, the necessary preparations for installing an SSL certificate have been made to prove the validity of the identity of the website. Plans for increasing capacity and eventual migration of the server have also started - to provide optimum experience for the users who see the platform.

## Erasmus+ Documents library

All documents pertaining the Erasmus+ project can be found on this link:

<https://ffosz.ukim.edu.mk/en/documents/>

To view and download each of the documents, simply click on any of the links inside the page.

## Final thoughts

Please note that the platform is still young. That means that there are very few (if any) discussions being made currently. As time passes and more people wish to participate, the community will grow and subsequently the quality of the reading materials will rise.

As a new platform, it's also constantly being updated and upgraded to feature new technologies and interesting pieces, so we highly encourage everyone to check by from time to time and see what's new.
